SUSTAINABILITY AT THE CORE

Founded in 2026, AMA Sourcing is a textile buying house based in Lahore, Pakistan. Sustainability guides our sourcing vision, from organic and recycled materials to traceability, partner audits and resource improvements. We connect product development, sampling and commercial coordination with production follow-up, quality control and shipment planning for buyers worldwide.

Home textiles

Technical textiles

Product selection, material availability and factory suitability are reviewed against each inquiry.

Product photographs are illustrative.

From inquiry to shipment.

Seven services and a clear sequence of decisions, approvals and order stages. The scope and responsibilities are agreed around your product brief.

Our services

Product Development
Resolve fabrics, construction, measurements, trims and finishing details.

Sampling
Agree sample stages and review fit, measurements, colour and workmanship.

Fabric & Trims Sourcing
Discuss composition, weight, colour, labels, fastenings and packaging.

Costing & Negotiation
Compare specifications, quantities, pricing assumptions and shipment terms.

Order Follow-up
Coordinate approvals, production milestones, updates and change decisions.

Quality Control
Agree inspections, acceptance criteria, reporting and corrective actions.

Logistics & Shipping
Coordinate packing, documents, nominated forwarders and dispatch requirements.

Your order journey

1. **Inquiry**
   Product brief, quantities, destination and target date.
2. **Pricing**
   Review the product brief, quantities and commercial basis to establish pricing.
3. **Product Development**
   Develop fabrics, construction and samples for review against the brief.
4. **Approval**
   Agreed sample, specification, price and terms.
5. **Production**
   Progress updates and decisions against the plan.
6. **QC**
   Checks and findings against agreed criteria.
7. **Shipment**
   Packing, documentation and agreed dispatch.

Responsible sourcing, documented for your order

Our approach includes organic and recycled materials, traceability, partner audits and measured improvements in water, energy and waste management.

Inspection plans and product claims are agreed for each order. Certification references are matched to current records and the relevant scope. Environmental claims require defined methods and supporting evidence.
